Co-Coordinator of the GHHG Working Group Global Child Health

## Description:

As part of the Global Health Hub Germany's *Week of the Working Groups 2021*, the Working Group Global Child Health is organizing a webinar session on **March 24<sup>th</sup>, 2021, (1:00 – 2:30 PM CET)** on the issue of **“How does the COVID-19 pandemic affect the health and well-being of children? – Narratives from low-resources settings”**.

This session builds on narratives which the Working Group "Global Child Health" has collected during the first Covid-19-wave in 2020. Together with speakers from different LMICs, the working group assesses local interventions regarding positive or negative outcomes on child well-being. The goal is to identify successful health and policy interventions, as well as the needs of children in low-resource settings.
